dINEX

What about SiC? →

Know Your Ceramics

Silicon-Carbide Ceramics

- *The premium-option*
- *Tougher and more heat-resistant*
- *Extended service intervals*

dINEX

What should I choose? →

Know Your Ceramics

What should I choose?

*For typical
long-haul operations*

*Save costs
Go for Cordierite*

*For urban duty cycles
or very high mileage*

*Maximize durability
Go for Silicon-Carbide*

How is Dinex different? →

Know Your Ceramics

The Dinex Difference

Freedom to choose:

What fits your fleet? Cordierite as standard, or Silicon Carbide for demanding duty cycles. Always engineered to OEM standards.

Platinum + Palladium coating

Unlike suppliers relying on platinum alone, Dinex' proprietary blend combines platinum's low-temperature efficiency with palladium's high-temperature performance and cost-effectiveness — ensuring reliable results across all conditions.
