

DPF Return & Inspection Checklist

1. Core surface inspection

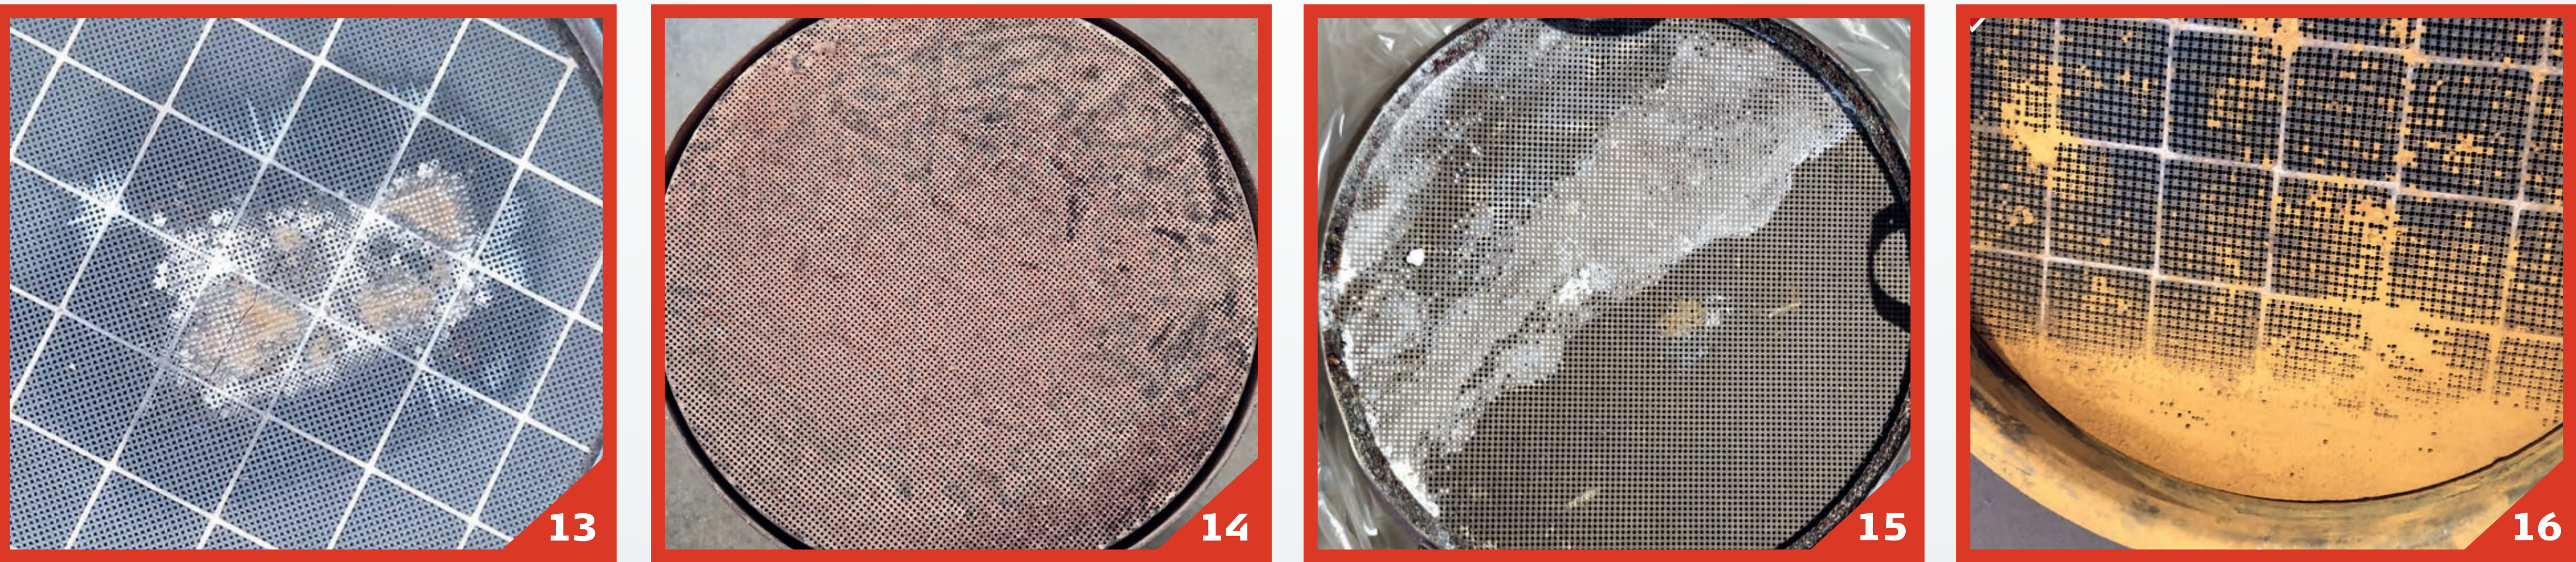

✓
No damages larger than 20 mm wide, and/or 4 mm deep (1). Visible soot on the inlet side (2), but not on the outlet side (3). Minor traces of rust (4).

✗
Damages wider than 20 mm (5), or holes deeper than 4 mm (6). Cracked core (7), and visible soot on the outlet side (8).

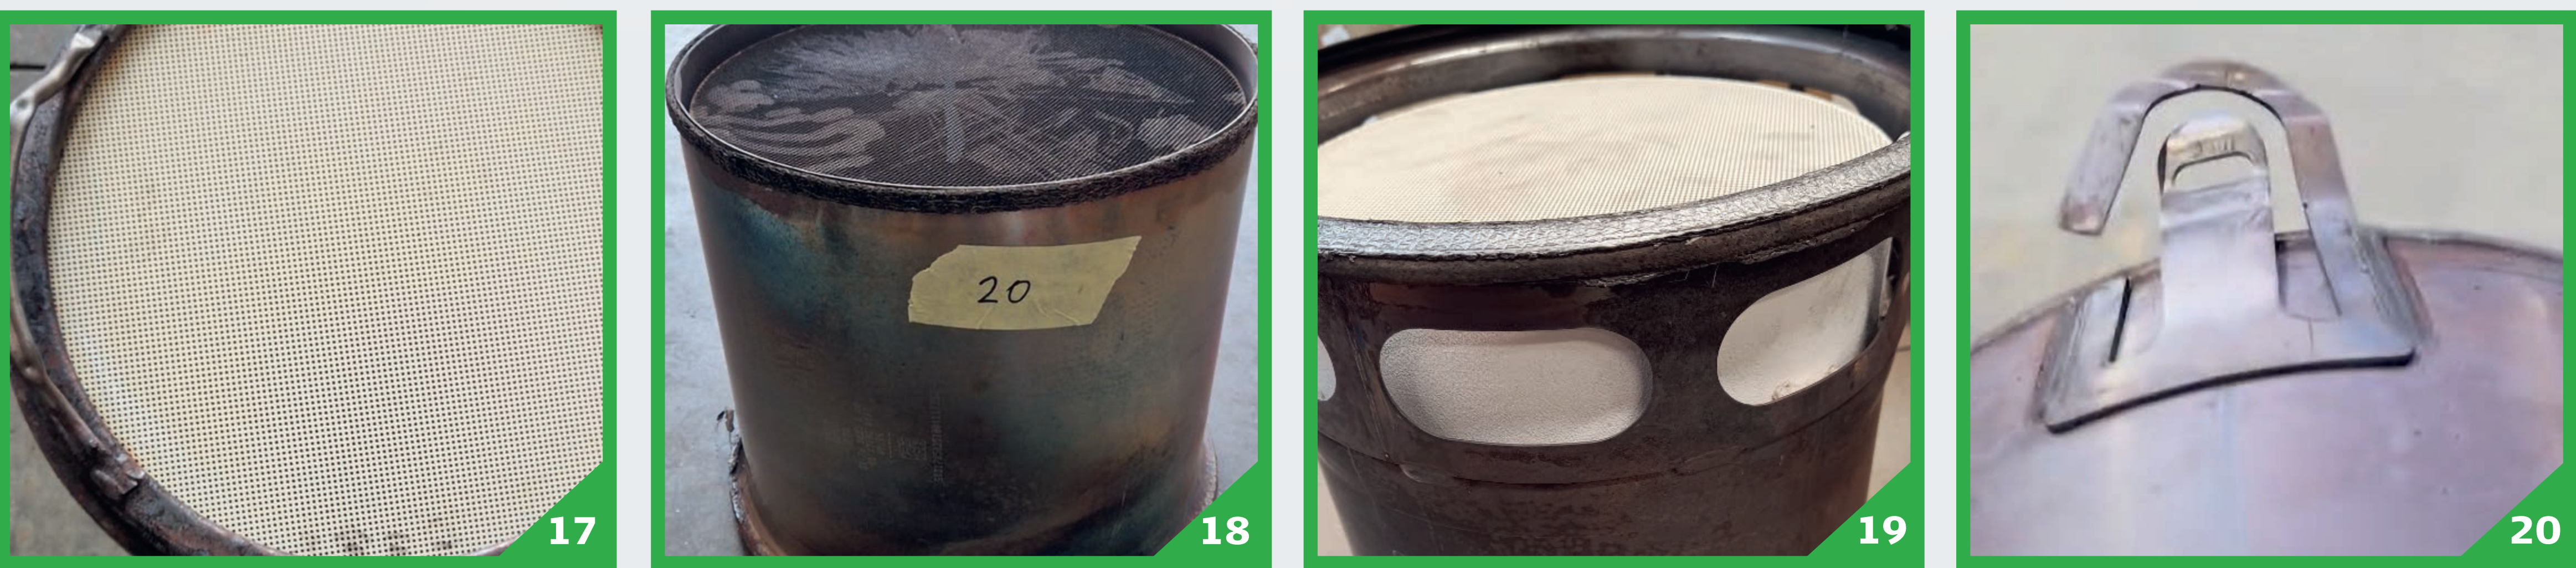

✗
Damages to the core edges, both major (9 & 10) and minor (11). Porous core (12) - shows as small holes in the face of plugged channels.

2. Core visual inspection

✗
Traces of chemical damage (13), cooling liquid (14 & 15) or severe amounts of rust (16).

3. DPF housing inspection

✓
Rust or miscoloring of the DPF housing (17 & 18). Mispositioned, pushed-out core (19) and damaged or dented brackets and sealing surfaces (20).
